

# MD RAHMAT

Mechanical Engineer

8750467241

Noida Sec 56 UP

rahmat888666@gmail.com

## ABOUT ME

Mechanical Engineering graduate with knowledge of manufacturing processes, quality inspection, and industrial operations. Completed internship at IOCL with exposure to testing and plant workflow. Skilled in CAD tools like SolidWorks and Fusion 360, with interest in manufacturing and production roles.

## EDUCATION

**DELHI SKILL AND ENTREPRENEURSHIP UNIVERSITY (DSEU)**  
**GB PANT ENGINEERING COLLEGE, DELHI**

2023–2027

Bachelor of Technology (B.Tech) – Mechanical Engineering

## SKILL

- 3D CAD Modeling and Drafting
- Mechanism Design & Motion Understanding
- Attention to Detail
- Part, Assembly, and Drawing Creation
- Basic Design for Manufacturing
- Team collaboration

## WORK EXPERIENCE

**Mechanical Design Projects – College Level**

**2026 ( JAN )**

- Worked on an automatic lid opener project using an iris mechanism for controlled opening and closing.
- Designed parts and assemblies and studied basic mechanism motion using CAD tools.
- Developed a tibia bone model for orthopaedic learning by sectioning the bone digitally to help understand bone fracture concepts.
- Converted CAD models into 3D printed prototypes for practical demonstration.

**Indian Oil Corporation Limited (IOCL) – Loni LPG Bottling Plant**

**2025 ( June – August )**

Department: Statutory Testing & Painting of LPG Cylinders

- Gained hands-on exposure to statutory testing procedures of LPG cylinders as per safety standards.
- Observed and assisted in hydrostatic testing, visual inspection, and rejection criteria of cylinders.
- Learned the surface preparation and painting process used for LPG cylinders.
- Understood industrial safety practices, quality control, and compliance requirements.
- Observed plant operations and workflow in a large-scale industrial environment.

**Design Engineering Intern**

**2025 (Feb – Aug)**

- Worked on assigned design tasks under the guidance of senior designers and team leads.
- Developed skills in automobile design, including CAD modeling and manual sketching.
- Gained exposure to vehicle design concepts, layout understanding, and design workflow.
- Improved work consistency, design accuracy, and documentation practices.
- Learned about current automobile market trends and industry requirements.
